## Antifreeze/Coolants

Manufactured with best quality materials that won't damage coolant systems, Beck/Arnley's Premium OE Quality Antifreeze/Coolant provides superior corrosion and rust protection. The Asian Imports formulation contains no amines or borates and is free of silicates. They utilize Phosphated Organic Acid Technology also known as Hybrid Organic Acid Technology (HOAT). The European Imports formulation specifies silicates in Euro Concentrate and in Euro ++ Concentrate, but not in Euro SF+ Concentrate. None of the European Coolants contain borates, phosphates or amines.

**Asian Imports**

 <b>Green Concentrate</b> Formulated specifically for <b>Acura, Daewoo, Geo, Honda, Hyundai, Infiniti, Kia, Mazda, Mitsubishi, Nissan, Subaru, and Suzuki</b> models. <small>252-1001U, 252-1001C</small>	 <b>Red Concentrate</b> Formulated specifically for <b>Lexus and Toyota</b> models. <small>252-1002U, 252-1002C</small>

### Transmission Service

The Car Care Council recommends a complete fluid and filter change every 30,000 miles.

**Why do I need it?**  
Transmission fluid is subject to extreme heat and is susceptible to oxidation and moisture. Transmission fluid leaks, sludge and varnish on the parts inside your transmission. Early detection, or even no fluid is detected, can mean failure and lead resulting in average to the very expensive repair cost.

**What are the benefits?**

- Improves transmission performance
- Shift smoother
- Helps reduce fuel consumption
- Reduces friction and wear
- Prevents overheating
- Extends transmission life

**FACT:**  
90% of all transmission failures are caused by overheating. Source: ASE (Automotive Service Excellence)

### Fuel System Service

MAP (Merchandise Assistance Program) suggests fuel system cleaning every 15,000 miles.

**Why do I need it?**  
Carbon builds up in the intake manifold, around valves in the fuel injection and in the combustion chamber. If fuel delivery is not performed to remove the carbon deposits, this will lead to rough idling, stalling, hard starting and poor fuel economy.

**What are the benefits?**

- Boosts power and performance
- Improves gas mileage
- Also smoother
- Reduces starting
- Reduces emissions
- Extends fuel system life

**FACT:**  
"A clean intake tract is essential for maximum, trouble-free operation and it minimizes air pollution emissions...excessive idling and rough idling should be reduced to the level." Source: EPA

### Power Steering Service

The Car Care Council recommends Power Steering Fluid Changes every 30,000 miles.

**Why do I need it?**  
Power steering fluid, like other essential system fluids, is subject to heat, pressure and contamination. Over time, fluid breaks down, creating an increase in friction and noise when you steer.

**What are the benefits?**

- Improves steering system performance
- Eliminates noise
- Means easier and smoother
- Prevents cold starting difficulties
- Prolongs normal and initial maintenance
- Extends steering system life

**FACT:**  
Checking the fluid level and changing at intervals recommended by the manufacturer will bring long life to the hoses, pistons, valves, seals and power steering pump itself. Source: AutoMall.com

### Engine Service

**Why do I need it?**  
Engine oil is the lubricant of your engine. It is exposed to constant pressure and extreme heat. These effects, along with contaminants by-products of combustion, degrade your engine and produce sludge. If sludge or soot specified intervals don't inhibit engine oil that to change the oil every 3,000 miles or more, your oil has not been changed at the recommended interval. Engine oil that is 3,000 miles, or if your oil has been subject to excess contamination, (leaking the engine oil system is recommended) every oil change.

**What are the benefits?**

- Improves engine performance
- Runs cooler
- Reduces friction and wear
- Prevents cold start damage
- Reduces engine friction
- Extends engine life

**FACT:**  
The engine is the most expensive system in your vehicle to replace.

### Cooling System Service

The Car Care Council recommends flushing your cooling system every two years. Make sure it's flushed every year. Flushing is a preventive maintenance.

**Why do I need it?**  
In modern engines, only 1/2 of the fluid in a closed cooling system is ever replaced. It is essential to be able to flush the entire cooling system through the radiator and the rest of the system. The most fluid should be flushed out of the cooling system. The most fluid should be flushed out of the cooling system. The most fluid should be flushed out of the cooling system. The most fluid should be flushed out of the cooling system.

**What are the benefits?**

- Improves cooling system performance
- Prevents overheating
- Prevents rust and scale
- Prevents corrosion
- Extends cooling system life

**FACT:**  
90% of all roadside breakdowns are cooling-system related. Source: ASE (Automotive Service Excellence)

### Air Care Service

You should clean the HVAC system as soon as you notice foul, musty, or stale odors coming from the vents.

**Why do I need it?**  
The full system evaporator needs your attention to remove dust and moisture. While it makes it less dust and allergens, bacterial matter provides a place for mold, bacteria and viruses to grow, which can trigger health problems and cause bad odors.

**What are the benefits?**

- Improves interior air quality
- Eliminates odors, allergens and microorganisms such as bacteria, mold and viruses
- Provides a naturally clean, fresh and fresh up to the inside

**FACT:**  
The air inside your vehicle can be up to SIX TIMES dirtier than outside. Source: CarLife.org
